Some notes of importance:

Finishers 13 through 21 became confused on the course due to the traffic and the brightness because the race was held in Feb. instead of Jan. You know the sun position. Don't these sound like some of your runners excuses.

Actually the sign on Miller road had been removed. This was not known to the race director. The director's apologies to the runners for this problem.

Also, the last two runners never did get back and it was only later that they were discovered in the clinic area.
